

Systems Limited Information Document

Systems Limited is an online learning platform focused on fullstack engineering and practical software

development. The mission is to make coding simple and fun while ensuring learners gain job-ready

skills through real projects.

Founder: Ali Sarwar, fullstack engineer and content creator. Community: 121K+ YouTube subscribers, 2.5K+ students, 7K+ LinkedIn/Instagram followers.

Community Platforms YouTube with 121K+ subscribers and 7M+ views. Content includes Golang,

Docker, TypeScript, Node.js, MERN, HTML, JavaScript, and fullstack roadmaps. Discord with

2.5K+ active members. LinkedIn with 7K+ professionals.

Companies with Systems Limited Students Infosys, Deloitte, HCL, TCS, Accenture.

Courses Offered

Gen AI – Master the Art of Building AI Products with JavaScript in 12 Weeks Duration 30+ hours.

Level ranges from basic to advanced. Recorded Hinglish lectures, updated September 2025.

Rating 5.0/5 with 120+ learners. Skills: chatbot and AI assistant development, prompt engineering,

retrieval augmented generation, autonomous agents, AI projects including ChatGPT clone, AI

image editor, voice cloner. Covers deployment, guardrails, memory, and API integrations. Tech

stack includes JavaScript, TypeScript, LangChain, LangGraph, Pinecone, OpenAI, Groq Cloud,

React.js, Next.js, Node.js, Express.js, AWS. Syllabus includes 23 modules, 98+ lessons.

Examples:

foundations of generative AI, prompt engineering, working with LLMs, ChatGPT clone project, and

advanced modules. Prerequisites: JavaScript ES6, optionally TypeScript, React, Node.js.

Certification provided. Refund policy: 23-day money-back guarantee.

Fullstack (MERN) – Become a Production Ready Engineer in 14 Weeks Duration 80+ hours.

Intermediate level. Recorded Hinglish course updated June 2025. Skills: MERN stack (MongoDB,

Express, React, Node.js), microservices and event-driven architecture, secure REST APIs, authentication and roles, state management (Redux, Zustand), WebSockets, CI/CD, Docker, Kubernetes. Project: multi-tenant real-time pizza ordering and tracking application deployed with

Kubernetes. Tech stack includes TypeScript, React, Next.js, Redux, Zustand, Express, Socket.io,

Node.js, PostgreSQL, MongoDB, Redis, Stripe, Kafka, Docker, Nginx, AWS. Syllabus includes 18

modules and 347+ lessons. Topics: microservices, project setup, dockerization, and advanced

content. Certification provided. Self-paced access with multi-year validity.

Backend Foundation – Master Backend Development through Hands-on Training Duration 46+

hours. Beginner friendly. Recorded Hinglish course updated July 2025. Skills: networking fundamentals, HTTP, Linux and VMs, API design, schema design, web security, testing, monitoring, performance, system design, containers, design patterns. Project: AI-powered family

assistant. Syllabus includes 17 modules and 34+ lessons. Example topics: networking, HTTP,

Linux, servers, API design. Certification provided.

Golang (Upcoming) Learn Go by building real-world projects with focus on Go basics, concurrency,

REST APIs, and web services.

Membership Membership includes access to all current and future courses, early access to new

courses, private community access, and a 23-day money-back guarantee. New courses are included. Student discount available with proof.

YouTube Systems Limited YouTube channel hosts 200+ free tutorials including MERN stack, Node.js,

Express, React, JavaScript, and API development.

General FAQ Systems Limited provides online courses and tutorials to help students become fullstack

engineers and succeed in tech careers. Courses are beginner friendly, project-based, with lifetime

access and certification. Refund policy applies (7-day or 23-day depending on course).

Support is

provided via Discord community and mentor sessions.
